

Experienced software engineer and programming enthusiast with rich experience in programming low- and high-level software applications. Currently focused on Go, containerized, scalable, and event-driven microservices, DDD, and cloud.

Software Engineer

May 2018 - Present

Self-Employed [B2B]

Working as a contractor in multiple projects at positions of *Senior* or *Tech Lead* Software Engineer covering the following responsibilities:

- design and development of modern applications based on containerized, event-driven microservices, cloud- and scaleready
- software development leader working with Clean-Architecture, DDD, Agile methodologies
- highly involved in a solution design process collaborating closely with product stakeholders
- open-source contributor

Architectures: Microservices, Event-Driven, Cloud

Technologies: Go, Kubernetes, Docker, GCP, Firestore, MySQL

Software Developer Lead

January 2016 - May 2018

UBS

Responsible for architectural design, implementation, testing, maintenance, and deployment of internal enterprise applications. Technical leader of the development team and scrum master.

Architectures: Microservices, SOA, Monolithic.

Technologies: Java, Spring Framework, JS, AngularJS, Apache Solr, Oracle DB, Jenkins, Tomcat

Software Developer

are Developer December 2014 - January 2016

Comarch

Responsible for implementation, testing, and deployment of the new features for the cloud-based backup and file synchronization service.

Technologies: Java, Spring Framework, C#, .NET 3.5+, PostgreSQL, MongoDB

Lead Industrial Automation Software Engineer

June 2013 - December 2014

teamtechnik Group

Responsible for implementation, testing, deployment, and commissioning of full stack software applications (low-level automation as well as auxiliary high-level applications) of assembly and testing lines for the automotive industry. Responsible for the technical leading of project-oriented international teams.

Accomplished several projects in Poland, China, and Germany.

Technologies: C#, .NET 3.5+, Oracle DB, Siemens Simatic S7

Industrial Automation Software Engineer

April 2013 - June 2013

teamtechnik Group

Responsible for implementation, testing, and commissioning of low-level automation systems of assembly and testing lines for the automotive industry.

Industrial Automation Software Engineer

March 2012 – April 2013

Siemens

Responsible for implementation, testing, and commissioning of low-level automation systems of hot steel rolling mills.

Accomplished several projects in Poland, Germany, and Turkey.

PROJECTS

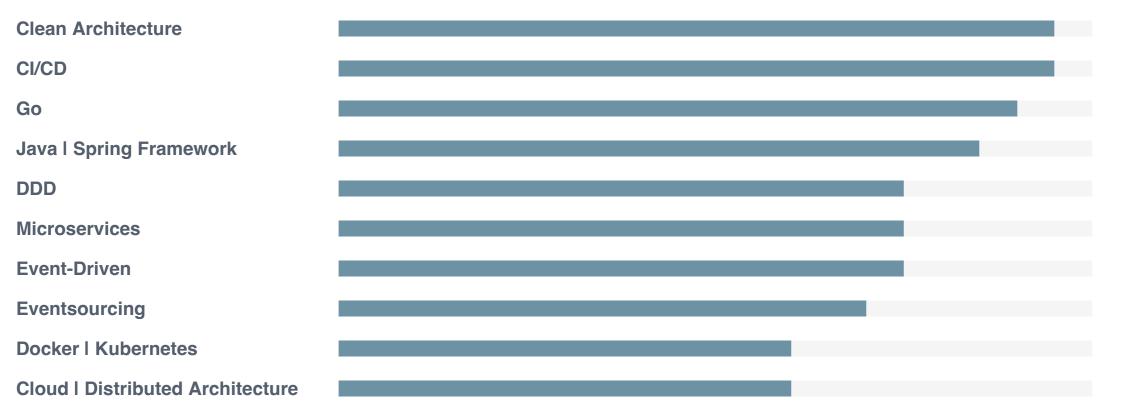

GetHarley - The first telehealth platform connecting individuals to experienced clinicians for a personalised discovery of products and treatments.

KARHOO - A leading technology platform that enables commercial partners to offer ground transportation services worldwide.

go-structurizr - An open-source library for auto-generating C4 diagrams from Golang applications.

Sabre NGP - A modern cloud-based application infrastructure focused on a high performance and development experience.
